

Bite Size Learning

Getting Started

- Find the **Elements 4D** app and open it
- If you want to use it later, download it to your phone or tablet

Pick one of the cubes

- Press **Start 4D**
- Hold your phone over the cube and see what happens
- Pick up and turn the cube while holding your device steady
- Try other elements or make more cubes

Molecules

- Place Hydrogen and Oxygen side by side and look through the viewer

Play to see what you can discover

Predict:

This app is an example of Augmented Reality

What do you think the definition of AR is?

Deduce:

Why is the app called Elements 4D and not Elements 3D?

Try the Crayola Color Alive app

If you draw on the front of the dragon or fairy, does it show up on the back of the character?

What else can you discover?
